Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest "a magnetizing coil wound onto the frame member and the base plate" in combination with the remaining claim elements as in claims 1-7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Matsumoto et al. discloses a shutter driving apparatus having a base plate, a blade supported pivotably on a supporting shaft, an electromagnetic actuator, a frame member, a rotor, a magnetizing coil and a yoke. Matsumoto et al. does not teach or suggest "a rotor one end of which is supported by the frame member and *an opposite end of which is supported by the base plate*" or "a magnetizing coil wound onto the frame member *and the base plate*" as claimed.

Sangregory et al. teaches a rotor having one end supported by a base plate.

Koyama et al. teaches winding a coil on a resin plate that supports shutter-driving actuators.
